

risk manager plus

Making risk management much more manageable

Introducing Risk Manager Plus

One system. Multiple capabilities.

Risk Manager Plus is a powerful, web-based platform that enables you to manage risks, incidents, policies, and much more.

Innovative, configurable, and tailored to the needs of Catholic organisations, it makes managing your responsibilities easier than ever.

You can manage risks specific to your organisation, record and report incidents to CCI, as well as develop and distribute important organisational policies – all within the one platform. And that's just for starters.

If you want a single, cost-effective platform for creating safer workplaces, complying with legislation, and improving the quality of your services, Risk Manager Plus is the perfect choice.

More than a Risk Management System

The rich functionality of our online system is designed to help you and your organisation in the following areas:

Risk Manager Plus system modules

Risk Manager Plus has a comprehensive suite of modules to help you manage and assess a range of areas.

Risk Management

This module helps you assess how effectively you're managing your risks. It provides a centralised place for documenting your risks, applying controls, taking actions, and generating reports.

Incident Management

You can record and investigate incidents, and even report them directly to CCI. The module also helps you identify what's gone wrong so you can put corrective measures in place.

Policy Management

Use this module to create a central location for all your policy documents. Whenever an update or sign-off is required, the system can manage those changes for you automatically to save you time and hassle.

Audits & Inspections

This is ideal for creating questionnaires for audits and inspections, checking your levels of compliance, and scheduling future audits. It also reports on actions taken, and all data goes straight into the system.

Contractor Management

You can create a register of all contractors working for you, including a preferred suppliers list. You can set up standard operating procedures and checklists, manage inductions, and record individual job details. It also links to the Risk Management, Policies Management, and Incident Management modules for a seamless flow of information.

Camps & Excursions Management

This module is for schools colleges and Catholic organisations, and enables you to conduct risk assessments for camps and excursions to help keep staff and students safe when offsite. You can choose from a range of standard templates or create your own.

Emergency Management

Be better prepared for emergencies by using this module to create policies and procedures you can automatically apply in pressure situations. The guidelines you establish here can improve your organisation's response in an emergency.

Key Management

Keep your organisation more secure and avoid the cost of replacing keys and locks by creating a key register. You can document all your keys, who has them, and why.

Asbestos Management

With this module you can establish an asbestos register for your properties. This will enable you to notify contractors or visitors about the exact location of any potentially hazardous materials.

Tree Safety Management

Keep students, staff and community safe, and meet your work health and safety obligations by creating a register of all trees on your properties. You can also schedule and record inspections and maintenance.

Asset & Property Management

This creates an online register for managing your assets and properties, as well as recording actions like inspections. It also links to other modules like Risk Management, Incident Management, Policy Management, and Audits & Inspections to make accessing related records simple.

Facilities Management

Part booking system, part risk management tool, this module streamlines the way you manage your facilities by providing prompts for risk assessments, inspections, key management, and many other aspects of hiring out halls.

Essential Services Maintenance

Document the testing and maintenance of essential services equipment like fire extinguishers, hydrants and exit signs. Record your planning activities, demonstrate compliance with your legal obligations, and report areas that require further work.

Work Health & Safety Management

This module helps you manage your WHS obligations and comply with WHS laws and regulations, including your due diligence obligations. It has a standard WHS management plan, due diligence diary, and policy template to establish objectives, nominate targets, assign responsibilities, etc.

Business Continuity Management

Minimise disruptions to your organisation by creating and documenting business continuity policies and processes with this module. It can help you reduce downtime, protect your assets, and improve operational resilience in the event of an incident.

Key Benefits

Cost-effective, comprehensive and configurable, the Risk Manager Plus platform is the perfect business intelligence system for managing your governance, risk and compliance responsibilities, driving workplace safety and improving service quality.

- ✓ A one-stop platform for all your risk, incident and policy management
- ✓ Accessible online or offline, from desktop and mobile devices
- ✓ Integrates with third party systems
- ✓ Exclusive pricing for Catholic organisations

- ✓ All functionality and all modules included in the price
- ✓ You'll get a dedicated risk consultant to help with set up and provide ongoing support
- ✓ Powered by Integrum, one of the world's leading developers
- ✓ Independently and securely hosted in Australia

The risk management system that's more affordable

Not only are we making risk management more manageable, we're also making it more affordable.

To begin with, we have exclusive pricing for Catholic organisations, which includes a three-year fixed price that's lower than our competitor's.

And, costs will be reduced for clients who sign up with more than one organisation on their account.

What you pay gives you access to all functionality, as well as the complete suite of modules.

And our implementation costs are fixed and kept low.

With Risk Manager Plus you know all your costs up front. The only surprises are just how affordable it is, and how much easier managing your risks can be.

Keep up to date with the latest news, insights and updates.
